

## *Christian Education Alliance*

### **The Principle Approach**

The *Principle Approach* is a philosophy of education and of life! It is not new--it comes from the Word of God. It is a philosophy of education (and, therefore, the philosophy of life) of the founders of this country. America abandoned these principles and the results have been disastrous for individuals and the country. The *Principle Approach* is a return to those **Biblical principles**. It teaches individuals to **reason from Godly principles** in every area of life.

The *Principle Approach* presents **seven Biblical principles** identified in American history and **how to apply them** in daily life. It helps students understand:

- How to find a Bible lesson in geography or in mathematics
- God's providence throughout history for mankind and the United States
- Why God would have us study grammar
- How language reveals a nation's view of God
- How America can be called a Christian nation
- Why we should be patriotic
- How man's view of God determines his type of government
- How studying history builds a positive self-image

The methodology of the *Principle Approach* is a return to **internal effort** in learning rather than external "programming" of the student. This is accomplished by using the 4 R's to develop individual notebooks.

1. RESEARCHING: reading, listening, observing
2. REASONING: finding significance according to God's Word
3. RELATING: to present generation
4. RECORDING: restating with student's words
