

## **Science Project Final Presentation Guidelines**

### **Before you present:**

Bring your board up to the front of the class and set it up.

Give your project notebook and assessment sheet (filled out) to Mr. Bausback

### **Presentation Guidelines:**

1. Introduce yourself by name and introduce your project.
2. Describe the Question that you were trying to solve with your project.
3. Testing: Describe how you tested your idea and what type of data you collected. How many tests did you run – how many days were you testing?
4. What did you find out? Tell us about the results of your tests and what other info. you learned about your topic. What are the flaws with your process?
5. Describe one funny thing that happened during your project.

### **Only if Time Allows:**

6. Where would you go from here? If you were to continue your project, describe what you would do next. What new questions came up that could be solved?
7. Questions from audience: Allow 2 questions from the audience about your project.
