

How technology has SHRUNK the size of my radio station!

N6HI 1982 Station (ABOVE)

Multi-Mode station for 80-10 meters, plus 2 meters. This station, for its time, had some excellent capabilities, but could not be easily moved!

N6HI 2009 Station (LEFT) Less than 1 square ft.

27 years later, look how modern technology has “shrunk” the station! In less desktop space than the original station's power supply, today's station includes all of the capabilities of the 1982 station plus *lots* more, including more bands and modes!
