Spreadsheet maintained by Nate Nagel who can be reached at njnagel@cox.net

I've made an effort to be accurate "beyond a reasonable doubt" in this spreadsheet however I cannot guarantee accuracy of any numbers that I have not personally verified on a car, which is more than I'd like.

If you find an error on this spreadsheet or have a valid part number for an application that

I don't have listed, please email me and let me know. Also if you can help

fill in some of the factory part numbers for which I don't have books I'd appreciate it.

Unfortunately, I can't be responsible for any harm that comes to you due to

unintentional errors in this sheet. (there are no intentional ones <G>)

so please use common sense when purchasing parts based on numbers listed here.

Whenever possible take your old factory part to the store with you to compare.

Thanks so much!

I have posted this on my web site which is <http://members.cox.net/njnagel/>

so if you find yourself using it on a regular basis check back every now

and then to see if there have been any additions or corrections.

(1) – Osram/Sylvania catalog lists R10W/5008 for these lights – this is WRONG and will make your taillights too bright.
