Toledo Exposition  
Toledo Ohio

April 26 (Saturday)  
Work Party  
Avon Field

June 8 (Sunday)  
Opening Day Fun fly  
Avon Field

## New Year Fun Fly

This will be a short news letter. Usually there is a whole column covering the fun at the fun fly. Well not this year. News year day was a storm that even the most foolish of members won't risk a plane.

I did see some fliers the next week. I and **Ray Doan** and **Tim Reardon** became airborne in January. DuBro makes a fair pair of skis that work well, so you too can fly in winter.

## Club Meeting

The next regular club meeting is on Friday night February 8 at 7:00PM at the Avon-Lions Community Cabin.

Directions are on the [web site](#).

There will be a presentation on building and finishing scale aircraft. Because of this the business meeting part of the meeting will be as short as possible. The number of agenda items is usually small for the February meeting, and this year is not going to be an exception.

Bring your current project to show. This is the building season and others are always curious about what is going on in the cave of other members.

## Road Trip

We currently have Monday February 18 set aside as Road Trip day. This is Presidents day and most kids have the day off from school. The MAPS museum in

Akron is going to be open on Monday. If there is a group of some size, we can get some extra museum guides and they would be glad to have us. At the last meeting several members expressed an interest in going on a Road trip. An agenda item for the February meeting will be setting up who/how we can take a trip. Be there and help plan this winter event.

## For Sale:

Check out the web site. In talking with several clubs who have web sites they notice the one of the least used portions of their web sites. You can find several good buys on several club web sites. If you need a plane you don't have to care about, these sites can offer used planes at a pretty good price. If you are on the learning curve and want to keep your good looking plane in pristine shape, consider buying someone else's used aircraft and be able to beat it up till you learn to fly well. Even if the engine falls off the firewall (I have had that happen) you don't have to feel bad. Think about it.

If you have a used plane that in that corner of the basement behind the furnace. Consider putting it on the for sale section and let it free some space for the new ones. Take a digital picture and contact **Al Smith** our web master and have it posted.

Remember to **keep Rudder Bob Kleinhenz** (440-892-1029) informed of your all season flying  
To purchase club fuel call **Bud Bornemann** (440) 327-2210.
